

# INFORMATION REPOSITORY SYSTEM

CUSTOM PROJECT 2 : PROJECT REVIEW

FACULTY GUIDE: MR. AJIT KUMAR PASAYAT,  
ASST. PROFESSOR, DEPT. OF CSE, CUTM, BBSR CAMPUS, JATANI

TEAM: NISHA AGARWAL,130301CSR030  
AJIT KUMAR SAHOO,130301CSR017  
MOHAMMAD SALMAN HAIDER,130301CSR018

# INTRODUCTION

This project's main idea was to implement a network based application for uploading and downloading required information for research and request for books, thesis, projects, journals, question banks etc, through online application.

# OBJECTIVE

To create a website where study materials can be uploaded and downloaded hassle free.

To create a forum where students and faculties can interact with each other even after college hours.

Three white lines of varying lengths and slopes are positioned in the bottom right corner of the slide, creating a modern, abstract graphic element.

# PROBLEM STATEMENT OF PROJECT

In present scenario users need to go to library and search for required books and pay fine which is a manual process.

In order to overcome this problem, a repository system is needed in the CUTM Network.

# ABOUT EXISTING PROJECT

This project aims to deal with the digitisation of the contents of the library and offer uploading and downloading of the contents such as books and other materials in addition with thesis, projects, journals, question banks etc, through online application.

# PROBLEMS IN EXISTING PROJECT

Earlier, there used to be college library where students used to take and read the books for the limited time period and the students should return the books with in that time and it is also a big mess to the library administrator to manage the books in the library. And then the library system was digitised in the college but the contents of the library were not digitally available.

# SCOPE OF PROPOSED PROJECT

Student and faculty can interact with each other such that the learning process does not halt altogether even after college hours. The materials can be downloaded into own personal computers for future references.

Furthermore, the users can also look for references of journals, thesis or other research materials.

# FUNCTIONALITIES PROPOSED

- ✓ A maximum number of materials are made available to each and every student and faculty and staff.
- ✓ Student and faculty and staff can read the materials online at anytime and anywhere.
- ✓ Student and faculty and staff have to login to their respective accounts.

# FUNCTIONALITIES PROPOSED (CONT)

- ✓ Student and faculty and staff can upload and download materials.
- ✓ Student and faculty and staff can comment or take part in the online forum.

# TECHNOLOGIES USED

**Front End** : HTML 5.0, JavaScript,  
CSS(Bootstrap)

**Scripting Language** : PHP

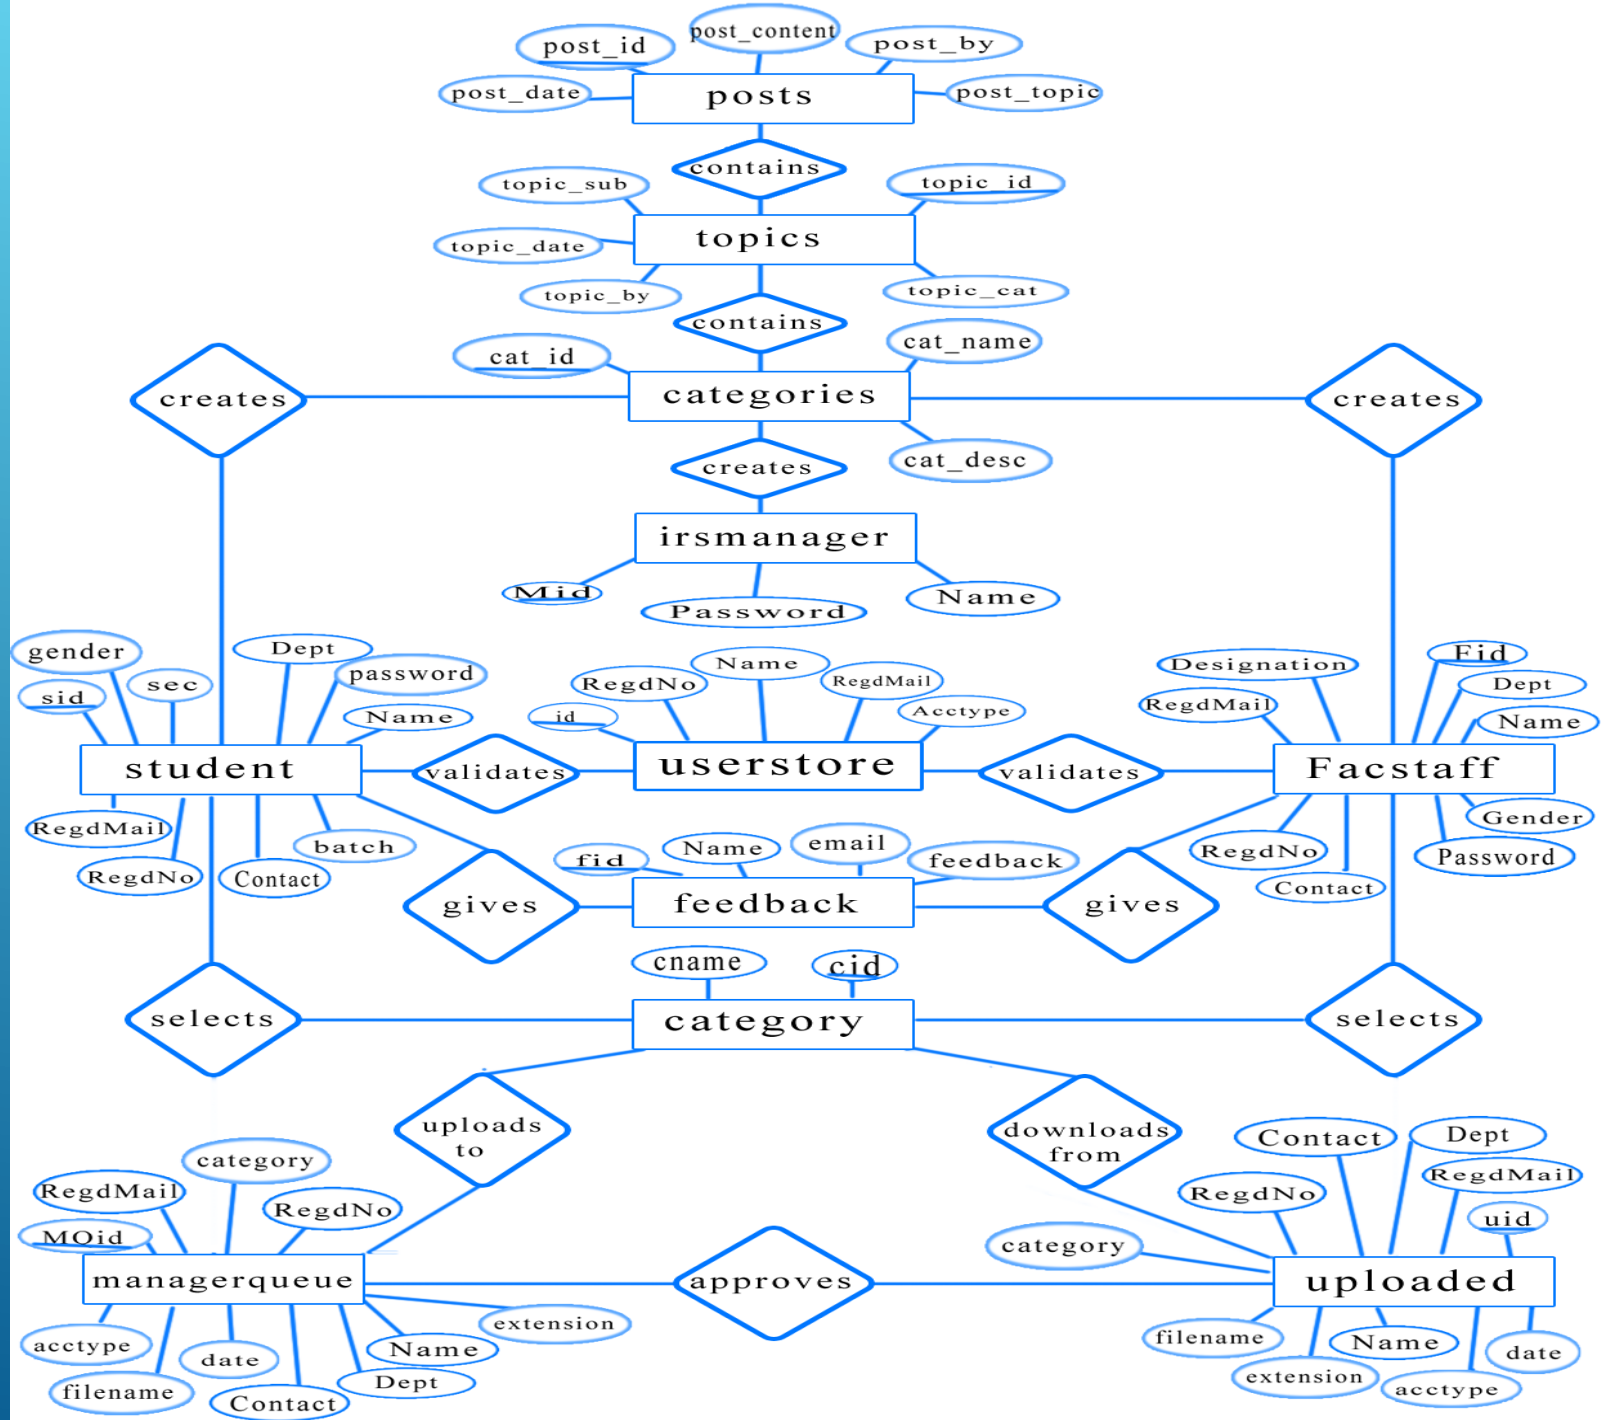

**Web Servers** : tomcat7 and apache

**Backend** : My SQL

**Browser Program** : Google Chrome

# REGISTER, LOGIN, UPLOAD AND DOWNLOAD PAGE

# CONCLUSION

This project dealt with the digitization of the contents of the CUTM Library. This project is developed strictly according to the feedback given to the team during requirement gathering phase of this project.

Three white lines of varying lengths and slopes are positioned in the bottom right corner of the slide, creating a modern, abstract graphic element.
